

Inspiring and Enabling Innovation in Polyolefins

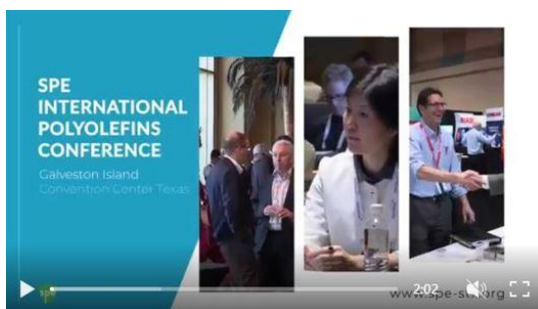

The 2025 SPE International Polyolefins Conference will be on **February 16-19, 2025** at the [Galveston Island Convention Center](#) in Texas.

The SPE South Texas Section in collaboration with the SPE Polymer Modifiers and Additives Division, the Thermoplastic Materials and Foams Division, the Engineering Properties and Structures Division, the Building and Infrastructure Division, the Applied Rheology Division, and the Flexible Packaging Division are organizing the program to **celebrate the 50th year of the conference**. The Galveston Island Convention Center overlooks the beach and is a great place to be in February so join us.

The Largest Polymer Conference in the World Dedicated to Polyolefins

The conference will include a Sunday afternoon tutorial. Starting Monday there will be 130+ technical presentations, keynote speakers every day, and an exhibition hall of over 60 industry suppliers, ranging from equipment, compounding, additives, and more. There will be two networking socials to celebrate the 50th year and to meet people. Come and help judge the student poster competition. On Wednesday there will be a special session to commemorate the 50th year of the conference. More than 900 people are expected to attend the conference.

The Conference will have a powerful software platform that will allow you to see the program, speakers, student posters, and virtual exhibitor and sponsor booths on your mobile device or computer. All of the papers can be accessed during the conference and up to 6 months after the conference. Attendees can also contact speakers and other attendees during the conference through the software platform. For virtual attendees, all the keynote speakers and a special session on Wednesday commemorating 50 years will be **LIVE STREAMED** on the software platform.

If you are interested in becoming an Exhibitor, a Sponsor, a Registered Attendee, or you would like more information about the conference, click on the appropriate button below:
